

MoM: Meet - 8

10 April 2026

MEETING DEBRIEF:

- A report to be submitted to the client before the next meeting, detailed below.
- Ensure all the code is free from hardcoded ports, URLs etc. to prevent issues with deployment as faced with other teams previously.

EXPECTED DELIVERABLES:

- A 4-page report inspired by other documents in the industry on these grounds like Tools report etc. Main aim being a description of the project and to help future prospective developers understand the approach of the current codebase.

FUTURE WEEK PLANS:

- Finetune Qwen 2.5 1.5B and possibly explore other bigger models to chase better accuracy.
- Experiment with ASR models if the Anuvaadhub requests are not approved on time.
- Experiment with using API keys and improving the vocal pipeline in general.
